PROFESSIONAL SUMMARY

Software Developer with experience in backend and frontend development using PHP, Laravel, MySQL, REST APIs, and database-driven systems. Skilled in building scalable web applications, dashboard systems, API integrations, and workflow-based solutions with clean and efficient development practices.

TECHNICAL SKILLS

Languages: PHP, Python, Kotlin, SQL
Frameworks: Laravel, REST API, HTML, CSS
Database : MySQL
Tools : Git, GitHub, Docker, Postman, VS Code, PhpStorm, Android Studio

RELEVANT EXPERIENCE

DropTruck – WeHaul Logistics Pvt Ltd — Sep 2025 - Present

Product Development -Tech

- Working on backend and frontend development for internal dashboard and panel management systems.
- Developing Laravel-based web applications with MySQL database integration.
- Implementing REST APIs, API routes, authentication, CRUD operations, and workflow-based features.
- Managing database operations and improving application functionality for internal business workflows.
- Using Git, GitHub, Postman, and Docker in development and testing processes.
- Collaborating with teams to build scalable and efficient software solutions.

PROJECTS

Insurance Management System
Final Year Project

- Developed a web-based Insurance Management System using Laravel/PHP, MySQL, HTML, and CSS.
- Implemented authentication, policy management, admin dashboard, and database-driven functionalities.
- Built modules for managing users, policies and application workflows.

Job Board, Task Management & Event Management
Learning Projects

- Developed multiple Laravel-based applications during backend development learning and practice.
- Implemented authentication, CRUD operations, routing, form handling, and MySQL integration.
- Built features for job posting, task tracking, and event scheduling systems.

EDUCATION

Bachelor of Engineering - Computer Science
Pet Engineering College
2021 - 2025
CGPA: 8/10

HSSLC BOARD EXAM
Govt. Hr. Sec School
2021 - **88%**

LANGUAGES

- English
- Tamil
